On all orders

GENERAL DIRECTIONS

Method of Shipping. We request that you let us decide as to the best method of shipping, either by Parcel Post, Express or Freight, but be sure to furnish us with your Express address and Parcel Post address.

Open Accounts. Bank references must be given in order to open an account, but no account will be opened for less than \$ 10.

Orders Below One Dollar. Owing to the high cost of packing, please do not ask us to fill orders below \$ 1.

Early Ordering is of great advantage, as orders are filled in rotation, and we wish to be fair to all.

Packing. All plants and bulbs will be packed with greatest care and by experienced packers.

Growing of Bulbs and Plants. All bulbs and plants which we ship should grow, but disregard of planting instructions or delay in planting, after arrival of the bulbs and plants, are sometimes the cause for dissatisfaction.

Correspondence. We will be pleased to answer all correspondence promptly, but if you make your inquiries as brief as possible it will greatly assist us.

True to Name. Accidentally, through an unforeseen rush, we may be sold out of a certain variety, in which case we will send you a substitute of similar color and quality, with the correct name. If this is not desired, money will be refunded.

DOZEN, 100, or 1,000 RATE. We supply 6 of one variety at the rate of one dozen, 25 of one variety at the rate of 100, and 250 of one variety at the rate of 1,000.

✻ We send full cultural directions with each order ✻

FRENCH BULBS FOR VERY EARLY FORCING American Grown

The two varieties named below have been grown for us in the United States and are due to arrive at our packing house in August. They can be delivered upon arrival or at the time your order is received, for immediate planting in order to have early flowers. Follow the direction given with each variety, and you will have an abundance of dainty, attractive flowers in early winter. We start our book with these bulbs as they are the earliest flowering bulbs we offer.

Paper-White Narcissus

Suitable for growing in water and gravel,
sand or fibre.

We handle only the **Giant Grandiflora** variety, which is a great improvement over the ordinary Paper-White Narcissus. It can be had in bloom from Christmas until Easter, either in pots, bowls or boxes. Upon arrival, plant them immediately, if wanted early, and put in a cool place in cellar or pit, free from frost. When well rooted they can be taken into heat, and if watered freely they will produce an abundance of beautiful blooms. They are not hardy.

Doz. 100 1000

Jumbo or Exhibition Size \$ 1.00 \$ 7.50 \$ 70.00

Lilium Candidum

Narcissus Paper-White Grandiflora

Golden Yellow Paper-White Narcissus, Soleil d'Or

Soleil d'Or resembles the Paper-White Narcissus very much, in habit, but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paper-White Narcissus. We expect to have some very fine stock of this variety to meet the steadily increased demand of the last few seasons. Do not forget to order a few and get acquainted with this wonderful flower. We offer only the Exhibition Size, \$ 2.50 per doz., \$ 18 per 100, \$ 160 per 1000.

Lilium Candidum

This is the exquisite Madonna Lily, which produces a large mass of snow-white flowers on straight stems. Plant these bulbs in the open in September or October, and protect them well from frost, as they are not extremely hardy, and during May or June you will have an abundance of flowers. Can also be planted in pots and by putting them in a cold-frame for three months, well protected, then taking them into a greenhouse, the same success will be yours. Jumbo bulbs only, 40 cts. each, \$ 4 per doz., \$ 30 per 100.

All orders will be fully PREPAID in U. S. A.

GIANT DARWIN TULIPS

(MAY FLOWERING)

THE PRIDE OF THE GARDEN

These Tulips have created a real sensation for the past few years, and one really does not wonder when seeing them in full bloom. They got their reputation through merit alone. They are most brilliant in color and of the greatest variety of shades. Each flower is extremely large, thereby producing a most gorgeous show in any garden, either in beds, borders or among shrubbery. With the exception of a few varieties, they are not very satisfactory indoors, and one must be an expert grower to flower them in the house at all, but they never fail outdoors.

FROM GROWER TO CONSUMER

WE OFFER THE PRODUCTS OF OUR OWN HOLLAND NURSERIES

TULIPS

CULTURE OUTDOORS

If soil is loosened about 12 inches deep before planting and if possible mixed with leaf mold or well-rotted stable manure, the best results can be expected. Tulips should be planted 4 inches below the surface of the ground. Cover them after the ground is frozen, although covering is not strictly necessary. Remove covering in the spring when tops are approximately 4 inches high.

CULTURE INDOORS

For indoor culture see our directions, which we supply with each order.

OLD ENGLISH COTTAGE TULIPS

(May Flowering)

The tulips belonging to this class owe their name to the fact that many of them had been found growing about country houses and cottages in England and France generations ago. In the hands of skillful gardeners, and by careful hybridizing and selecting the best soil that could be found, the selection has become very extensive. All imaginable colors are now represented in this class. They all have long stems and very graceful formation and are therefore unsurpassed for the garden and excellent for cutting.

Cottage Tulips for the Connoisseur

Lily flowered Tulip ARTEMIS

FEU ARDENTE.

BREEDER TULIPS

These Tulips, although formerly listed among the Cottage varieties, form a distinct class in themselves being an unbroken form of the old-time Florist's Tulip. The Breeders, strange to say, were discarded by their originators, the old Dutch gardeners, because they had no stripes or feathers, and until recently they were placed in the background of borders and other obscure places. Now that a taste for art colors has been awakened, together with a desire for bronze, brown, and buff tones, attention is again drawn to these old-fashioned Tulips, and within a very few years they have become the most popular of all the late Tulips.

They well deserve their popularity, not only their peculiar and artistic coloring, but for their lasting qualities as well, for this makes them unusually well suited for garden decoration, slow forcing, and cut-flower use. In size of flower, length and strength of stem, and general beauty they far excel the Darwins.

This class of Tulips will prove very interesting on account of their peculiar forms and different habits of growth.

Breeder Tulips for the Connoisseur Collection 9

Hyacinths in a group are very handsome

HYACINTHS

Hyacinths will grow in any good soil, but they prefer a rich light soil. The method of growing is as simple as that of tulips; but when planted in pots the top of the bulb should be level with the surface of the soil, and plenty of water should be given when in the house or conservatory. When planted outdoors they require six inches or more of cover (preferably light) after the first sharp frost, as they are not as hardy as tulips, the cover to be partly removed after the middle of March if there is no snow.

Special Collection of Exhibition Hyacinths

	Each	Doz.	100
GENERAL DE WET. Immense light pink spikes resembling Grand Maitre. Very delicate	\$ 0.20	\$ 2.00	\$ 15.00

Single red and pink shades

GENERAAL DE WET. Light pink; immense spike like Grand Maitre. Very delicate.

GERTRUDE. Dark pink; compact truss. Fine for pots or bedding.

GIGANTEA. Light pink; broad, compact truss, of great merit.

LADY DERBY. Soft rose; large truss. Fine for pans as well as outdoors.

LA VICTOIRE. The finest brilliant scarlet Hyacinth. Very early.

Single white and blush-white shades

ARENTE ARENDSE. Snowwhite; special for early forcing.

GENERAL VETTER. Fine truss; large bells; almost pure white.

GRANDEUR A MERVEILLE. Blush-white; large truss. Very attractive.

LA GRANDESSE. Pure white; long truss.

L'INNOCENCE. Pure white; large truss; extra-fine large bells. Very fine bedder and forcer.

Single light and dark blue shades

BISMARCK. Bright blue; very fine for forcing in pots.

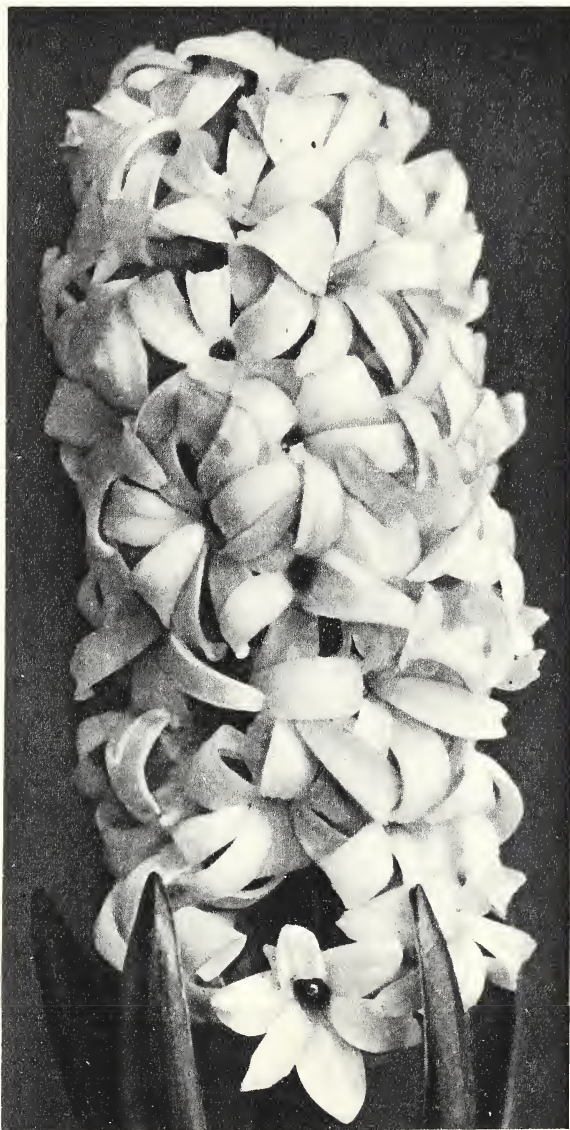

GRAND MAITRE. Immense porcelain-blue spike of great substance. The best of all porcelain Hyacinths.

KING OF THE BLUES. Dark blue; splendid truss. Very fine.

MENELIK. Almost black; large glittering spike.

PERLE BRILLIANTE. Light blue; erect and perfect shaped spike.

QUEEN OF THE BLUES. Light blue. Extra fine for forcing; also does well in a bed.

Single yellow and violet shades

CITY OF HAARLEM. Golden yellow. The purest and finest yellow Hyacinth.

DISTINCTION. Ruby-red, striped garnet; very early.

LORD BALFOUR. A beautiful large truss of a violet shade.

SIR WILLIAM MANSFIELD. Ruby violet; splendid truss.

YELLOW HAMMER. The largest of all yellow Hyacinths. Light yellow; very fine truss.

Special Bedding Hyacinths

The Hyacinths selected for this purpose excel in vigor as well as size of truss the so-called Unnamed Bedding Hyacinths, as these are selected from our First and Second-Size Hyacinths and are consequently very superior. Plant 8 inches apart and with at least 4 inches of soil on top of the bulb. Give them the same treatment as other Hyacinths.

Miniature or Dutch Roman Hyacinths

These are the Hyacinths used for growing in bulb-pans, and if planted ten to twelve bulbs to an 8 or 9-inch pan they cannot be surpassed. They are apparently small bulbs, but in comparison to their size they produce immense flowers. On account of their low price and splendid results, they are very much in demand for house culture. By planting only one kind in a pan, the best results can be obtained, as then they produce an even growth. By following the same cultural directions as given for the Hyacinths, failure is impossible. They are also greatly used for bedding.

NARCISSI OR DAFFODILS

In order to have a beautiful bulb-garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States and it is small wonder that the demand is doubling every year. They are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut-flower purposes with every American gardener. We have compiled a list (as short as we could make it) of the best and most attractive varieties for indoor, and exhibition purposes, and it is complete and easy to select from.

Culture. The same as Tulips, although they should be planted as close as possible in the open or pans. After active growth commences, give plenty of water.

Culture Outdoors. They should be planted so that the top of the bulb is at least 5 inches beneath the soil. A little protection should be given during severe winter weather, although they are perfectly hardy.

In our descriptions we use the following terms: **Perianth**—the outer petals of the flower. **Trumpet**—the long cup- or trumpet-shaped center. **Crown or Cup**—the short or flat center.

FLAME.

See page 21

Explanation of Daffodil classes and Types

YELLOW TRUMPET varieties have trumpets which as a rule are longer or as long as the perianth segments (Petals). They usually have a light or deep yellow perianth with a trumpet of deeper yellow.

BICOLOR varieties have creamy or pure white perianth segments and yellow trumpets.

BARRII varieties have a light or deep yellow perianth segments and an expanded crown instead of a trumpet, which is light or deep with red* or orange edge.

INCOMPARABILIS varieties have light or deep yellow segments a crown of light or deep yellow very similar to a short trumpet.

LEEDSII varieties always have white segments, while the crowns are white or light yellow. They are very dainty.

POETICUS. Snowwhite segments, crowns usually heavily rimmed orange or scarlet with a green eye in center of crown.

POETAZ. Cluster flowered in white, light or deep yellow. Some varieties have orange or red rimmed small crowns.

JONQUILS. Usually bear small flowers in small or large clusters on one stem, and usually are sweet scented.

DAFFODILS FOR NATURALIZING

Hundreds of thousands of daffodils are used yearly for this purpose, because when once planted they continue without any care to give you unmeasurable joy year after year.

Numerous varieties have proved very successful for this purpose and we will use no others.

Practically all types of daffodils contain some varieties suitable for this purpose, thereby increasing the number of varieties and adding greatly to the desire of naturalizing daffodils.

Only sizes which are most desirable for naturalizing without continuous care are selected for your favorite garden spot. "The natural garden".

Practically any soil has been found suitable but when planted under and among trees and in woodlands, the leaves of the trees should not always be removed as taking away this natural food will not only injure your trees but also will prevent the daffodils from producing as they should.

Only such varieties having proved to be hardy are selected for that purpose.

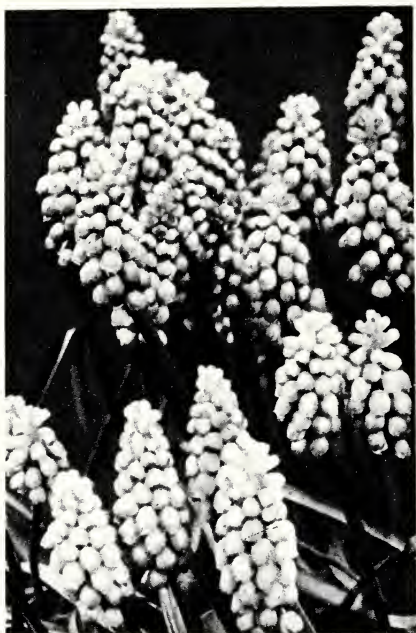

Plant at least 8 inches deep but avoid places where water may collect at any time as they like drainage.

Try to plant them before October 15th or shortly thereafter but place your order early as the demand is increasing for these bulbs at this special low price we have adopted and we cannot take orders for less than 100 bulbs.

Per 100 \$ 7.50.

Per 1000 \$ 70.00

Per 10.000 \$ 650.00

Muscari (Grape Hyacinths)

Snowdrops

(Galanthus)

Everybody knows the Snowdrops; with its little white bells coming through the snow very early in the spring practically the first flower to show itself after the dreariness of winter. It is a wonderful bulb for naturalizing and for every garden.

NIVALIS (Single). 60 cts per doz., \$ 4.00 per 100, \$ 35 per 1,000.

NIVALIS (Double). 70 cts. per doz., \$ 5.00 per 100, \$ 45 per 1,000.

Snowdrops

Muscari

(Grape Hyacinth)

The foliage of this plant is very similar to that of Scilla, but the flowers are of an entirely different form—grapelike clusters closely set—and are wonderful cut-flowers. Always exquisite when naturalized.

Alba, white per doz. \$ 0.50, per 100 \$ 3.50.

Blue Bird. An immense improvement over the former variety, the flowers being twice as large and growing taller, and of a delightful heavenly blue. \$ 1.50 per doz., \$ 11 per 100.

Heavenly Blue per doz. \$ 0.50, per 100 \$ 3.50.

Chionodoxa

(Glory-of-the-Snow)

An early-flowering spring bulb for borders or rockery. Produces flower-spikes bearing ten to fifteen scilla-like flowers. Perfectly hardy and should be planted close together for effect.

Luciliae. Deep blue, with a white center. Selected mother bulbs. 40 cts. per doz., \$ 3.00 per 100; \$ 25.00 per 1,000.

Sardensis, deep blue, per doz. \$ 0.60, p. 100 \$ 4.00.

Chionodoxa.

**Scilla Siberica**

SCILLA

Scilla Siberica naturalize splendidly, are cheap and so can be planted liberally, and everyone who has a garden should provide for the time when they will be excluded.

Siberica, Blue. 55 cts. per doz., \$ 4.00 per 100, \$ 35 per 1.000.

Siberica, Sky Blue. A trifle lighter blue than the former with large flowers of a most beautiful heavenly blue color, \$ 1.20 per doz., \$ 9.00 per 100.

Eranthis Hyemalis

(Winter Aconite)

Early in spring the golden blossoms look charming, resting on an emerald-green cushion of leaves and forming a striking contrast to the Snowdrops, Scillas, and Chinodoxas. The foliage remains long after the flowers, making the plant especially valuable in moist situations, such as under trees, which the Winter Aconite enjoys, and where few other flowering plants will thrive. 3 to 8 inches high.

0.40 cts. per doz., \$ 3.00 per 100, \$ 25.00 per 1.000.

Fritillaria Meleagris

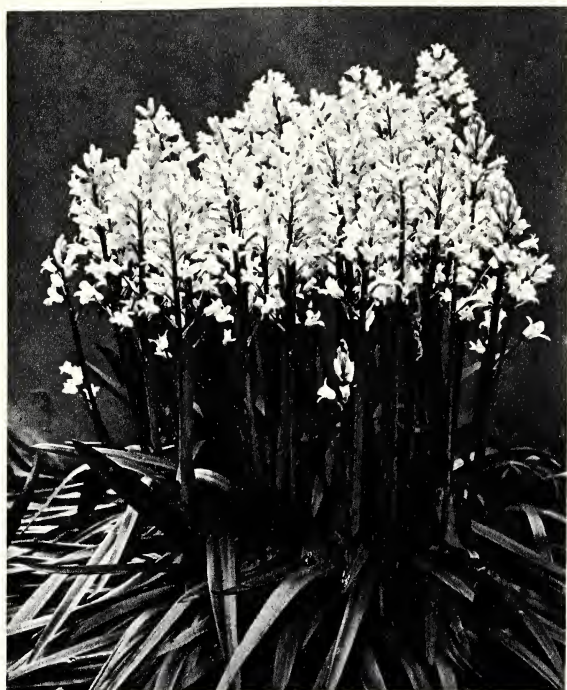

Singular, dwarf springflowering plants, bearing large, pendent bell-shaped flowers of various colors, in yellow, white, black, purple, striped and plashed, and checkered in the most curious way. They are invaluable for pot culture, and exceedingly pretty when grown in large groups in the garden border or wild garden in a dry situation.

Mixed. Select mixtures. Per doz. \$ 0.60, per 100 \$ 4.00, per 1.000 \$ 35.00.

**Fritillaria Meleagris**

A Word About Irises

It has been the experience of many that Irises planted in the spring will not bloom the first season, and we recommend September planting, not later. This rule applies to a great many varieties of plants. If you order plants from us, we will ship in the right planting season, in other words, we help those who are in doubt about „When to Plant“.

Iris Germanica

These beautiful Irises bloom early in the spring when the bulbs have just finished blooming, and because of their great variety of colors, they make a magnificent show. They are perfectly hardy and thrive in almost any soil; especially where they are exposed to the full sun. No home-garden is complete without a few clumps scattered about, and they are also excellent for massing and bordering.

We quote only the best old varieties and new ones.

To simplify making a selection, we have classified them with the following abbreviations:

Germanica, Ger. May-flowering; earliest of all. **Pallida, Pall.** Tall growers with large, sweet-scented, blue, lavender, and purple flowers.

Amoena, Am. Standards white; falls various shades.

Neglecta, Ng. Standards range from lavender to purple.

Plicata, Pli. Flowers have a frill-like lilac margin on a white ground.

Squalens, Sq. Standards are clouded shades of copper, bronze and fawn.

Variegata, Var. Standards are various shades of yellow.

3 for 75 c. 12 for \$ 2.50

100 for \$ 20.00

ALBERT VICTOR. (Pal.) S. Soft blue. F. Beautiful lavender. Large and fine.

AUREA. Rich chrome yellow. The finest pure yellow.

CELESTE. (Pal.) Pale azure blue.

QUAKER LADY. S. smoky lavender with yellow shadings. F. Blue and gold, stigmas yellow. Yellow beard. Odd and attractive.

QUEEN ALEXANDRIA. S. fawn shot with lilac. F. lilac reticulated at base with bronze. Beard yellow.

TENDRESSE. (Pal.) Delicate lavender and lilac.

VIOLACEA GRANDIFLORA. (Pal.) S. rich blue. F. violet blue. Large.

LA VESUVE. Intense brilliant blue.

JAPANESE IRIS

(Iris Kaempferi)

This queen of the large-flowering Irises is very attractive. It flowers a little later than the German Irises, which adds greatly to its popularity. The flowers are of an enormous size and there are single and double varieties, both being equally attractive and suitable for cut-flowers, as they really develop into a more perfect bloom if they are cut just before the bud opens and placed in the house in fresh water. The best time to plant these Irises, like all other Irises, is September, to allow them a fair time to make new roots before the winter sets in.

From grower to consumer

HARDY LILIES

Instructions for planting vary so widely that we mention method of planting with each variety. Ground should be loosened well about 12—15 inches and if leafmold and sand can be put in the bottom, so much the better to insure good drainage. It is not strictly necessary, but if the sun is kept off the ground with a mulch the lilies will do better than in sunbaked ground.

For planting late November

Lilium Regale

	Each	Doz.
HANSONI. Rich golden yellow, brown spotted, Does not always bloom the first year. Stem rooting. Plant 10 inches deep. Height 4 to 5 feet. Flowers June	\$ 1.00	\$ 10.00

Fritillaria imperialis

Fritillaria Imperialis (Crown Imperial)

This unique and most attractive flower derived the name "Crown Imperial" from the crown-shaped flower, as the photo illustrates.

Plant about 4 to 5 inches deep. Flowering time of this fine novel bulb is about May and June, and therefore should be planted early in the fall and it is for that reason that.

Orders after July 15th cannot be accepted.

Imperialis (Crown-imperial). One of the most characteristic plants of old-fashioned gardens. It is the most robust of all the species. The flowers are borne in umbels on stout stems, 3 to 4 ft. high.

Fine Mixed doz. \$ 6.00, 100 \$ 40.00

Freesia golden Daffodil

FREESIA

(For Greenhouse or Conservatory)

This is the most sensational flower for the above purpose and must be grown in cool house with plenty ventilation. Flowers are very sweet and last well when cut. **Monster bulbs only.**
